$\LaTeX{}$

$\LaTeX{}$ is a typesetting program that produces beautifully formatted documents from a raw text file. See here for an example with a template and resources to get started.

There are two basic components to using $\LaTeX$. You need to install:

1. The $\TeX$ packages, and
2. A $\TeX$ editor.

OS X

- Download and install MacTeX.mpkg.zip (6.0 GB).
- Go to `Applications/TeX/` and run `TeX Live Utility`
- `Actions → Update All Packages`

Microsoft Windows

- See the MikTeX page.
